

NEHA ATHAM

Software Engineer

@nehareddyatham@gmail.com <https://www.linkedin.com/in/neha-reddy-53b399195> Hyderabad, India

SUMMARY

I am a passionate Software Engineer proficient in HTML, CSS, JavaScript, and the MERN stack. I've architected capable web applications that significantly reduced page load times and elevated user satisfaction, successfully reaching over 2,000 active users. With a strong record of enhancing product performance, I led the launch of impactful e-commerce platforms that increased customer engagement and retention by up to 40%.

EXPERIENCE

Software Engineer

Lyros Technologies Private Ltd

📅 08/2023 - Present 📍 Hyderabad, India

Software Engineering company focusing on web applications

- Engineered user-friendly web applications with HTML, CSS, and JavaScript that elevated overall responsiveness; these solutions led to a 60% increase in customer satisfaction scores over six months
- Developed resilient and scalable web applications utilizing the MERN stack, resulting in a 40% decrease in load times and enhancing overall user satisfaction measured through feedback surveys from over 2,000 active users
- Built a streamlined navigation system for the web application which resulted in measurable improvements of up to 50% in user interaction metrics; currently serving more than 1,500 engaged daily users
- Embraced new technologies and agile software development methodologies to enhance project delivery, resulting in the on-time launch of three key features that increased user satisfaction by 25% across all platforms
- Crafted seamless interaction pathways through innovative UI designs, elevating overall user satisfaction scores from 75% to an impressive 90%, and directly increasing application usage rates among target demographics
- Formulated durable and scalable code architecture that upgraded software stability and performance; facilitated seamless integration across platforms, resulting in minimal user disruption

PROJECTS

SHNSM-I

Multi-Level Marketing platform

- Created engaging interfaces on an MLM platform allowing users to easily navigate through offerings; achieved high levels of satisfaction as reflected in a feedback.
- Developed a Multi-Level Marketing (MLM) platform using React.js, Node.js, MongoDB, and Express.js; onboarded over 500 users within three months while ensuring application performance met strict uptime requirements
- Integrated secure user authentication with hashed passwords, cutting unauthorized access attempts by 50%
- Designed and achieved 100% cross-device compatibility with a responsive layout using CSS3 and Bootstrap, increasing mobile user retention by 35%

EDUCATION

Bachelor of Technology

Bhoj Reddy Engineering College For Women

📅 06/2018 - 08/2022 📍 Hyderabad, India
