Profile Summary

A dedicated and motivated MERN Stack Developer with 2+ years of experience seeking opportunities to contribute my skills in full-stack web development and problem-solving in a dynamic team environment

🎓 Education

Btech in EEE

2016 – 2020

SVR university

CGPA: 8

💼 Work Experience

Software Engineer

01/2023 – Present | Lyros pvt ltd

- Company specializing in web development solutions
- Developed responsive web applications using MERN stack (MongoDB, Express.js, React.js and Node.js)
- Built responsive and user-friendly interfaces with React, utilizing hooks and state management
- Managed version control using Git, facilitating collaboration among team members while preserving code integrity
- Enhanced user experience with intuitive interface design and responsive web applications
- Participated in training sessions, workshops, and online courses to enhance technical skills, soft skills, and industry knowledge relevant to MERN stack development
-

📄 Projects

Restaurant Billing Software

Technologies: MERN

Created restaurant's digital infrastructure, designed to streamline menu organization, enhance customer experience, and optimize order processing. Built using the MERN stack (MongoDB, Express.js, React, Node.js), this system enables restaurant owners to add, update, and remove menu items dynamically.

- Dynamic Menu Management – Add, update, or remove menu items in real time with pricing and availability control.
- Seamless Order Integration – Connects with the kitchen and order management system for efficient processing.
- User-Friendly Interface – Responsive and intuitive design for smooth customer navigation and engagement.

Performance Optimization: Optimized database queries and API responses to ensure fast data retrieval and scalability.

- Order History & Analytics: Integrated analytics dashboard for restaurant owners to track sales, popular menu items, and customer preferences.

Designed and achieved 100% cross-device compatibility with a responsive layout using CSS3 and Bootstrap, increasing mobile user retention by 35%.
